Notifier by Honeywell: Response Paging System
Notifier by Honeywell: Response Paging

The paging solution for a range of applications

The Response Paging System offers the latest innovations in wireless paging and monitoring. It’s a cost effective and flexible paging system that offers the ability to quickly respond to activated alarms. The solution consists of a wall mounted transmitter and antennae that can send customised messages to designated pagers and are powerful enough to cover large areas.
Response Paging Solutions

Response Plus

Response Plus paging system has a wide range of applications that will fit all types of industries requiring a paging network. It can also be integrated with Notifier by Honeywell fire detection systems that immediately notifies designated fire marshals exactly where an alarm has been triggered, ensuring alarms can be identified and validated quickly, reducing time and costs associated with unnecessary evacuations.

Response Link

Response Link is an entry level paging system suitable for a range of applications. It includes four dry contact alarm outputs that provide basic emergency information whilst offering the same paging capability.

Response Aid

Response Aid supports the deaf and hard of hearing in case of a fire emergency. The device is set to Equality Act 2010 recommendations sending a strong vibration to every pager together with a text message alerting the user of a fire evacuation.
Response Plus from Notifier by Honeywell offers the latest innovations in wireless paging and monitoring. It’s a cost effective and flexible system that provides a variety of organisations and industries with the ability to quickly respond to activated alarms.

Fire Safety

Unnecessary evacuations have a significant impact on commerce and industry in terms of interrupted productivity, down-time and loss of revenue. They are also a considerable drain on the resources of the Fire and Rescue Services both in terms of lost time and costs.

Response Plus can be integrated with the Notifier by Honeywell fire detection and alarm system that immediately notifies designated fire marshals exactly where an alarm has been triggered, ensuring alarms can be identified and validated, reducing time and costs associated with unnecessary evacuations.

- Save money and time by reducing evacuations through quickly identifying triggered alarms
- Improve response times by enabling personnel to identify the exact location of an alarm
- Sustain productivity, output and sales through the avoidance of unnecessary evacuations
- Enhance safety by improving the coordination of evacuations
- Build better relationships with the local fire authority

Locations

Response Plus can be used within a variety of locations including factories, offices, universities, schools, hospitals, hotels and public buildings.
Applications for Response Plus

Response Plus not only provides benefits to the fire safety arena. It can be customised for a range of applications to suit any industry requiring the use of a wireless paging messaging system.

Hospitality

- Staff task messaging
- Reception bell/delivery door monitoring
- Disabled alarm messaging
- Security alarm messaging

Industry

- Production machine monitoring
- Gas alarm messaging
- Lone worker messaging
- First aider call point messaging
- Incident response team messaging

Healthcare

- Nursecall messaging
- Staff attack messaging
- Lone worker
- Critical incident messaging

Retail/Casino

- Store messaging
- Security system messaging
- Gaming machine monitoring

System Overview

Transmitter

- Rugged wall mounted central control unit that interfaces with your existing alarm installation
- 4 Watt paging transmitter and antennae, powerful enough to cover large areas
- “Healthy” unit LED indicator
- Signal transmit LED indicator
- Optional multiple alert transmissions to ensure message is received by pager
- Three protected frequencies to prevent any interference
- Compatible with the Notifier serial protocol

Pagers

- Simple, compact and discreet personal device for short messages
- Durable, rugged and reliable
- Small size, lightweight and comfortable to wear
- Easy to read alphanumeric text
- Robust belt/pocket clip
- Protective case
- Bright backlight
- Easy to replace batteries

Response Link

Response Link is an entry level option that features the same capability for paging whilst providing only basic information of an incident. This makes the system a cost effective solution for particularly smaller sites. Consisting of the same rugged wall mounted control unit Response Link connects to alarm installations via four dry contact alarm outputs and a 500 mW paging transmitter and antennae.
Response Aid from Notifier by Honeywell provides an easy-to-use, cost effective solution to support deaf and hard of hearing people in case of a fire emergency. The device is set to Equality Act 2010 (formerly the Disability Discrimination Act 2005) recommendations sending a strong vibration to every pager together with a text message alerting the user of a fire evacuation.

- Meets Equality Act 2010 requirements for alerting the deaf and the hard of hearing
- Improves your duty of care and welfare of your customers and staff
- Ensures safer, simpler and quicker evacuations
- Easy to use with clear and simple fire alert instructions
- Reduces the risk associated with evacuating deaf and hard of hearing people
- Provides independence and reassurance to those unable to hear fire alarms
- Adheres to BS5839
Approvals and recommendations

All components are fully tested and approved for CE marking. Transmitter complies with EN 300-224-1. Response Aid complies to BS5839 recommendations.

Equality Act 2010 recommendations require all UK employers make a provision for disabled staff and customers in the area of fire safety.

Response Aid helps you meet these obligations and can be installed across a variety of markets including hotels, retail stores, universities and government buildings serving customers, staff, guests and students in the event of a fire evacuation.

Notifier by Honeywell: Response Paging

System Overview

Transmitter
- Rugged wall mounted central control unit that interfaces with your existing alarm installation
- Simple to follow daily test and emergency procedures
- 4 Watt paging transmitter and antennae, powerful enough to cover large areas
- Battery standby provided by integral battery charger and power supply and sealed lead acid batteries
- Status indicator to show system is healthy
- Signal transmit indicator
- Manual test button
- Compliance with the requirements of BS5839 part 1 low battery audible alarm in the event of mains failure
- Multiple alert transmissions to ensure message is received by pager

Pagers
- Simple, compact and discreet personal device for short messages
- Durable, rugged and reliable
- Small size, lightweight and comfortable to wear
- Easy to read alphanumeric text
- Robust belt/pocket clip
- Repeating fire message until user evacuates the building
- Bright backlight
- Easy to replace batteries
Safety, Integrity and Heritage.

NOTIFIER by Honeywell is the world’s largest manufacturer and supplier of engineered fire alarm systems. With over 400 Engineered Systems Distributors worldwide, and regional support on every continent, we have the flexibility to meet our customers’ requirements.

With over 50 years of experience, we offer unrivalled specialist knowledge and products designed to meet all needs. NOTIFIER offers a comprehensive line of quality fire detection and alarm control solutions.

These include everything from smoke detection and notification, non-addressable fire alarm panels, analogue addressable systems, to advanced network and integration packages. As a leader in the fire safety market, NOTIFIER is dedicated to the highest standards of service and product quality. Our operations are accredited to ISO 9001 and our products are designed and manufactured to meet every major international approval, including LPCB, VdS, UL, ULC and BOSEC/ANPI.

NOTIFIER is a division of Honeywell International, a diversified technology and manufacturing leader, serving customers worldwide. By partnering with NOTIFIER, you have the reassurance of working with a company of global standing that provides cutting edge fire detection systems.
